

SECTION IX — EUROPEAN DATA PROTECTION SUPERVISOR

INTRODUCTION

The introduction to the budget request has been provided by each Institution together with the statement of estimate for its respective budget section. In line with Article 314§1 of the TFEU, which states that: '[...] each Institution shall [...] draw up estimates of its expenditure for the following financial year. The Commission shall consolidate these estimates in a draft budget, which may contain different estimates. ', the Commission has exceptionally adjusted the estimates of all Institutions. It is thus possible that figures referred to in the introduction of a specific budget section are different from those integrated into the Draft Budget.

This Statement of Estimates has been prepared based on the current regulatory context and the key challenges related to compliance with data protection and artificial intelligence laws applicable to EU institutions. As the selection procedure for the next EDPS is still ongoing, budgetary priorities may need to be adjusted once the new EDPS is appointed. This Statement of Estimates includes also the budget for the functioning of the EDPB and its Secretariat provided by the EDPS.

Providing timely guidance to the legislator is a key enabler of sustainable economic growth and a driver of business confidence in the European Union. In this regard, the EDPS has engaged in a number of initiatives aimed at fostering regulatory coherence and enhancing cooperation in the implementation of EU legislation within the digital economy. In recent years, the EDPS supervisory tasks have increased. This is not only because of the legal requirements for the EDPS to oversee several new activities in the area of freedom, security and justice (AFSJ), but also due to the volume of personal data processing activities by the AFSJ agencies, including in the context of a number of Large-Scale IT Systems that are expected to become operational between 2026 and 2029.

Furthermore, the supervisory task of Large-Scale IT systems is extended by the legislator beyond the AFSJ area. Recognising this challenge, recent regulations include provisions stating that costs incurred by the EDPS in carrying out these newly assigned tasks must be covered by the general budget of the EU. These new tasks require investments in technical expertise, external studies, IT tools, and training, all of which contribute to the necessary budget increase. Additionally, since the entry into force of the AI Act, the EDPS is the Market Surveillance Authority, Notifying Authority and Notified Body for all EU institutions falling within the scope of this regulation. The rapid development and use of AI tools by EUIs require additional resources for the EDPS to comply with its tasks and legal obligations under the AI Act.

The EDPB Secretariat needs to develop its litigation capacity to face litigation cases at the Court of Justice of the EU, to which it is a party. With its decision of 10 February 2026 (case C-97/23 P) the Court of Justice of the EU set aside a ruling of the General Court and ruled that a binding decision of the EDPB is an act open to challenge before the Courts of the European Union. Seven cases, corresponding to over €2.5bn of fines and settling key legal questions, will have to be defended on substance. In addition, it is likely that some future decisions of the EDPB will also be challenged. Following this ruling, the legal and financial risks for the EDPB have considerably increased. It is therefore essential that the EDPB is reinforced, to continue supporting the application of the GDPR. the

In addition, the EDPB must prepare for Regulation 2025/2518 laying down additional procedural rules relating to the enforcement of Regulation (EU) 2016/679, which will be applicable as of 2 April 2027. New legal duties stemming from this regulation require setting up new workflows, procedures and IT tools for collaboration on cross-border cases; additional resources for the EDPB's IT sector are needed to deliver and maintain these tools.

This Statement of Estimates reflects efforts to strike a balance between the growing needs of the EDPS and EDPB to cope with their increasing tasks and the guidelines received by the Budgetary Authority. The proposed overall budget for 2027 amounts to €32.535.000, representing an increase of 5,65%, which should

be viewed in context, notably considering the new responsibilities and subsequent need for additional resources arising from the AI Act and the supervision of Large-Scale IT Systems.

As regards the EDPS, the proposed budget under Title 1 shows an increase of 2,18%, mainly due to the rebalancing of appropriations under Article 112 which had been overly reduced in 2026. On the other hand, under Title 2, the proposed budget decreases by 5.02% compared to 2026, as a result of the efforts made to better rebalance appropriations. Nevertheless, within this Title, there is a significant increase in the share of appropriations which have to be allocated for the implementation of Service Level Agreements (SLAs) with other EU institutions, both in terms of their growing number and their substantially increasing annual costs.

Title 3 of the budget proposal, relating to the activities of the EDPB, shows an increase of 17,25%. The growth in Title 3 is mainly due to the European Commission’s unilateral termination of the SLA with the DGT, which had granted the EDPB access to free translation services and consequently results in a substantial financial impact. In addition, similarly to the EDPS, there are rising costs associated with the implementation of SLAs concluded with other EU institutions, along with a rebalancing of appropriations between budget items, mainly in favour of Article 303.

In conclusion, EDPS respectfully expresses its confidence that the Draft Budget 2027 will receive the support of the European Commission, the Council, and the European Parliament. This will allow the EDPS to continue safeguarding the fundamental right to data protection and to effectively oversee and support the responsible deployment of artificial intelligence technologies across EU institutions, agencies and bodies. Without additional resources, the EDPS would face significant constraints in fulfilling its mandate and ensuring compliance with EU regulatory requirements.
